

Empathy map canvas

Use this framework to empathize with a customer, user, or any person who is affected by a team's work.

Document and discuss your observations and note your assumptions to gain more empathy for the people you serve.

The "Deep Learning Model for Eye Disease Prediction" project is of great importance as it leverages state-of-the-art Al technologies to enhance early detection and diagnosis of various eye diseases. By categorizing conditions like cataract, diabetic retinopathy, glaucoma, and normal eye health, the project contributes to more timely and precise treatment, ultimately preserving patients' vision and quality of life. The use of transfer learning techniques underscores its commitment to achieving the highest performance in the realm of image-based medical diagnosis
